Welcome to the third quarterly newsletter aimed at keeping you up to date with construction works at Black Rock Quarry, Portishead.

This newsletter provides details of key milestones, general progress and information on construction activities and events. We hope you find this newsletter useful and informative.

Latest News

Work is progressing well on site and the steel frame and roof works are now complete, meaning the building is now water tight. Over the coming months the following works will be taking place:

- The gabion and cladding installation will commence early April which means the final appearance of the building will start to take shape
- The bio-diverse roof will start installation at the end of April, supporting the growth of several species and enabling the building to blend into its surroundings
- The internal fit out has now commenced and will continue throughout the project
- The incoming service connections will commence in May and the impact of this on Valley Road will be kept to a minimum. Further details will be released separately closer to the time

The site hours continue to be 0700 to 1800 Monday to Friday.

We remain on target for building completion by July 2013.

Community Projects

Regular liaison with local businesses, authorities, schools and colleges is continuing as we build close links in the area. We are involved in a variety of projects including:

- **Gordano School**: We are creating a business partnership with Gordano School and continue to work closely with them through careers advice, curriculum support, site visits and events.

- **The Portishead and Bristol Lifeboat** is the chosen charity the Black Rock Quarry site team are supporting throughout the duration of the project, through fundraising activities and assistance with development of their current site.

  [Image: The Portishead and Bristol Lifeboat current site]

- **Weston College**: We are actively working with Weston College to provide apprenticeship opportunities and support college events. We recently attended the WOW Careers event, promoting the importance of education to students at Worle School, and Miller provided talks on the skills they look for when recruiting in the Construction Industry.

**Considerate Constructors Scheme (CCS)**

The Black Rock Quarry site had their first CCS visit in December and achieved 36 out of 40. This means we have an exceptionally considerate site. The site is due its second visit on the 1st May 2013. Find out more about the Considerate Constructors Scheme by visiting their website [http://www.ccscheme.org.uk](http://www.ccscheme.org.uk)

**Blue Light Partnership Corporate Responsibility Plan**

The plan details how we will work to deliver tangible outcomes for the local area through employment initiatives and the use of local suppliers and contractors.

To date £4.2m out of £9.7m has been placed within a 35 mile radius of the site.
